## OBJECTIVE

Interested in a Web Developer role at a reputable organisation that is proactive, and advancement focused.

---

## SUMMARY OF QUALIFICATIONS

- Data Analyst and Web Developer with more than 5 years well-rounded experience in procedural and object-oriented design, user-centered design, and continuous integration
- Coordinated the development and maintenance of new and existing applications
- Conducted analysis with System Analysts for better understanding of user requirements
- Ensured that thorough processes of software development lifecycle were followed during development, deployment and testing phases.
- Write user story, requirement specifications, UML, Control-flow processing, Data Modeling etc.
- Demonstrated excellent team management skills and the ability to work with minimum supervision
- Excellent skills in SQL

## TECHNICAL SKILLS

### SCRIPTING AND PROGRAMMING LANGUAGE

- HTML5, CSS3, JavaScript, PHP (Laravel), React, Python for Data Science

### FRAMEWORK

- React, Bootstrap

### METHODOLOGIES

- Waterfall and Agile Approach
- Scrum

### DEVELOPMENT ENVIRONMENT

- Spyder, MS Excel, Jupyter Notebook, Vagrant etc.

### DATABASE

- MySQL, PostgreSQL, IBM DB2, Firebase

### OPERATING SYSTEM AND ENVIRONMENT

- Windows, MacOS, Docker (Laradock)

## EDUCATION

### MSc. Computer Science

University of Ilorin, Nigeria

2014

### BSc. Computer Science

University of Ilorin, Nigeria

2007

## PROFESSIONAL EXPERIENCE

---

### Data Scientist – Virtual Intern

June 2020 - Present

Hamoye

- Data Quality
- Conducting analysis with Python for Data Science
- Developing machine learn model (Regression, Classification – ensembles such as Decision Tree, Random forest etc. for prediction, performance of accuracy, feature importance.
- Data Visualisation using Tableau, Pivot Query etc.

### Data Analyst – Virtual Intern

May 2020 - Present

Darlytic

- Data Cleaning, Data Preprocessing, Data Wrangling etc.
- Using V-Lookup, Index-match, Range, Data Consolidation, etc.
- Conducting analysis with Machine Learning Algorithms using Sci-kit Learn, Pandas, NumPy etc.
- Data Visualisation using Tableau, Pivot Query etc.
- Writing structured Query Language for mining, turning and transforming data

### Web Developer

AdHome Creative, 318 Wolfe Street, London, Ontario

Aug 2019 – Mar 2020

- Developed web application in WordPress using WordPress functionalities, Plugins like ACF Pro, Search and filter pro, custom post type UI, etc.
- Worked on new and existing projects with huge turnover in productivity (active.ca, cassels.com, UoT Future Student, UoT Student Life, etc)
- Front-end programming with CSS, JQuery and HTML5
- WordPress PHP core to create functions, custom widget, child themes, shortcodes etc
- Created animation with CSS and JQuery

### Web Developer

Devlift Media Inc, 240 Waterloo Street, London, Ontario

Jan 2019 – Aug 2019

- Developing front-end interface with ReactJs, firebase etc
- Developing a Mobile Application in react-native, connecting to API using axios and fetchAPI
- Developing hospital management System (ongoing) in Laravel for patient information management, appointment, medical record, treatment history, report generation etc using Laravel, passport-authentication, MySQL and reactJS (personal project)
- Developed RESTFUL API using Laravel for Flavourvote App

### Web Developer

Kwara State University, Malete, Nigeria

Sep 2012 – Apr 2018

- Analyzed requirement specification for HR services i.e. promotions, performance evaluation, payroll, nominal roll etc. using standard software development process lifecycle principles
- Coordinated the development, deployment and implementation of a responsive in-house academic portal using Laravel PHP framework with AngularJS, JQuery and Bootstrap templates
- Implemented portal with in-house administration, which resulted in 80% saving of total amount budgeted for Infrastructure and IT services

- Developed, with a team, a Computer-Based test for internal/external examination using native PHP with OOP, which resulted in removal of substantial manual examination work
- Maintained and updated web content for the existing websites using HTML5, MySQL and CSS
- Worked closely with project managers and development team to develop detailed specifications and ensured timely completion of deliverables
- Refactored and optimized MySQL queries and enhanced system performance by 90%
- Managed existing educational portal, created an API to interface with other applications i.e. hostel management and account reconciliation
- Created an online registration form for library users to access PBRSSA, using HTML5, CSS, Twitter Bootstrap, PHP and MySQL

### **System Analyst/Web Developer**

Columbia University, New York City, USA

Sept 2015 – May 2016

- Using Excel for Data consolidation, Data Visualization and analysis
- Performed data cleaning, data transformation and other basic ETL
- Getting and cleaning data using R language by loading and merging dataset, then converted the activity and subject columns into factors
- Analyzed “In the same boat” mapping data using Python Pandas
